TA Instruments
What's New in TRIOS Software

TRIOS Software Overview

TRIOS is TA Instruments' state-of-the-art software package that uses cutting-edge technology for instrument control, data collection, and data analysis for thermal analysis and rheology instruments. The intuitive user interface allows you to simply and effectively program experiments and move easily between processing experiments and viewing and analyzing data. TRIOS software delivers a whole new experiment experience.

- Easy organization and data file management
  - A unique file-naming system allows for effortless organization of data files
  - The File Manager offers simple data file location
- Compatibility with the latest Windows Operating System platforms
- Maximum flexibility
  - Instrument control and data analysis via any computer
  - Configurable for multiple monitors
  - Ability to control multiple instruments at once
- Seamless integration between instrument control and data analysis
- Easy data export in a variety of output formats, including XML, Word, Excel, and PDF
- Effortless graph formatting
- Customization of the display

The TRIOS software is supported by a full range of services, including onsite training, customer service that is only a phone call away, and easy-to-use, easy-to-understand online help. All of these items reflect TA Instruments' commitment to providing thermal analysis and rheology products and related services that deliver maximum value for your investment.
